## Post-project monitoring results per implemented RECP measures

**54** from 70 or **77.1%** of RECP measures recommended by Project were implemented by 8 EaP GREEN companies from period 2017-2020

Total savings in 8 sampled companies amounted to **€315,000** a year. **70%** of which related to the **energy sector**, **1.5% to water**, **5.5% to raw material** and **23% to waste**.

Companies are adopting new technologies or modifying equipment and around **1.2 million EURO cost investments** were made during the past 3-4 years. **81% invested** in the **energy sector** and **15%** in **waste minimization and recycling (1% in water, 3% raw materials)**.

## Post-project monitoring results per implemented RECP measures

As a result, savings per year are  
**7,857,259 kWh** of energy,  
**4,290m<sup>3</sup>** water,  
**249 tons** of raw materials,  
**65 tons** of waste,  
**2,032 tons** of CO<sub>2</sub> emissions.
